

JOSEPH REECE MILLIGAN

reecemilligan@gmail.com • Huntsville, AL

EDUCATION

University of Alabama in Huntsville — Huntsville, AL

May 2025

Bachelor of Science, Computer Science | GPA: 3.364

Relevant Coursework: Introduction to AI, Introduction to Data Mining, Introduction to Big Data Analysis, Statistics, Algorithms, Calculus I–III, Linear Algebra, Senior Capstone

PROFESSIONAL EXPERIENCE

University of Alabama in Huntsville — Huntsville, AL

May 2025 – Present

Computer Scientist / .NET Developer — U.S. Army DEVCOM Support

- Integrate Palantir Vantage API calls into an enterprise DoD application, building on earlier Palantir Foundry data pipeline experience.
- Research, evaluate, and prototype AI technologies to improve application capabilities and workforce productivity, including an AI-powered search logging tool for reviewing team activity and a proof-of-concept workflow that automates secure document redaction.
- Build interactive data visualizations with D3.js and Power BI, and write SQL queries and stored procedures that turn raw data into insights for technical and non-technical stakeholders.
- Collaborate with cross-functional engineers, stakeholders, and end users to gather requirements, design solutions, implement enhancements, and resolve technical issues.
- Produce technical documentation and support the full software development lifecycle for enterprise applications.
- Participate in Agile development activities, including sprint planning, code reviews, testing, and source control management using Azure DevOps and Git.
- Develop and maintain enterprise web applications supporting mission-critical Department of Defense systems using C#, .NET, JavaScript, SQL, and REST APIs.
- Troubleshoot software defects, analyze root causes, implement corrective solutions, and validate functionality through structured testing.

University of Alabama in Huntsville — Huntsville, AL

Jan 2025 – May 2025

Undergraduate Research Intern

- Contributed to a two-person research project using Palantir Foundry to design and implement a data ingestion, modeling, and reporting pipeline for tracking undergraduate employee work efforts.
- Built data cleaning, transformation, and visualization processes to improve data reliability and accessibility.
- Developed an automated reporting system that aggregated individual work logs into structured summaries for supervisory review, reducing manual report generation time and improving operational efficiency.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C#, Java, JavaScript

Frameworks & Tools: Palantir Foundry, Vantage API, PyTorch, Scikit-learn, Pandas, Matplotlib, D3.js, Power BI, .NET, REST APIs, Django, SQLite3, Azure DevOps, Git, Visual Studio Code, Jupyter Notebook, Microsoft Office
